

PRESSURE-TEST RADIATORS / COOLING SYSTEMS FAST AND EASILY!

STRATEGIC
TOOLS & EQUIPMENT COMPANY

12VDC Electric Pump with Universal Radiator/Coolant System Adapter Part Number: UQ200

One tool kit to easily and effectively test cooling systems, regardless of radiator inlet size! The cap system fits all car and light truck radiators/ cooling systems, regardless of inlet size, using a set of rubber seals. The electric pump with built-in gauge makes the job faster and easier than using a hand pump. Packaged as a kit, in a plastic box that keeps the seals and washers in the right spot for future use. The 12VDC electric pump, universal adapter set, and pump with transfer adapter (to fit most caps on the market) are also available separately. Materials: steel body and adapter for pressure gauge attachment; rubber seals; steel washers. Kit comes complete with all required o-rings and washers.

12VDC Pump with Gauge
and Transfer Adapter

Universal Adapter

P/N UQ100: Universal Adapter

P/N UQ150: 12VDC Pump with Gauge & Transfer Adapter

P/N UQ200: 12VDC Pump with Gauge & Universal Adapter
